

1 45224/TJD/O125

ABSTRACT OF THE DISCLOSURE

5 A method for separating lightweight sheets to be discarded
interleaved with heavier items to be further processed. A gas
such as air is delivered by nozzles and directed at slip sheets
interleaved between photosensitive plates. The slip sheets are
directed by the gas to a discarded slip sheet area. An apparatus
10 for the slip sheet removal system comprising a plate handling
area and a discarded slip sheet area.
